Existing Global Infrastructure for Diamond Open Access

Key Infrastructures:

Redalyc: The largest platform in Latin America for fee-free OA journals.

SciELO: The largest OA platform in Latin America, supporting scholarly journal publishing without fees.

DOAJ (Directory of Open Access Journals): A global directory that aggregates OA journals, including many Diamond OA journals that meet quality standards.

Latindex: A directory system for scholarly journals in Latin America that promotes open access across the region.

- *Journal publishers in Indonesia such as universities, **ministries, local governments**, companies, foundations, Commanditaire Vennotschaap (CV).*
- *Initially diamond OA then changes when it is indexed internationally such as DOAJ and Scopus.*
- *Mandatory publication policy for lecturers and students.*
- *Diamond OA criteria input to journal accreditation*
- *Trapped in fake journals and predatory*

[Politeness Study](#)

Q2

Journal of Hunan University Natural Sciences, 2024 · [jonuns.com](#)

Abstract

This study arose from academics' concerns about the difficulties of translating utterances that communicate language politeness. This qualitative study focuses on data obtained from utterances, words, phrases, sentences, and texts divided into two categories: a source of linguistic data and a source of translation data from movie transcript Vampires and the Bronx in English and Indonesian subtitles. The data sources are documents (transcripts of movie dialogs) and informants (3 raters and translation experts). The data

- *We need to focus to journal or its publisher.*
- *DOAJ can also give special labels.*
- *PKP can also provide Diamond OA with customized plugins that point to the community.*
- *The need for policies that favor Diamond OA*
- *The use of free tools such as grammarly, turnitin etc.*
- *A system that can accommodate and control the number of publications in each issue, availability of names of editors and reviewers.*

AmeliCA: *An initiative in Latin America that supports **non-commercial publishing**. AmeliCA focuses on the global sustainability of Diamond OA.*

Europe (OPERAS): *Encourages Diamond OA integration with projects like **DIAMAS** and **CRAFT-OA** in Europe.*

Collaboration Goals: *Development of **Diamond Capacity Hubs** to coordinate platforms and journals.*

*Standardizing journal quality with the **Extensible Quality Standard for Institutional Publishing (EQSIP)**.*

Challenges of Diamond Open Access Journals

1. Financial Sustainability

*Dependent on alternative funding (e.g., grants, institutional support).
Struggles to secure long-term, consistent funding.*

2. Quality Assurance and Editorial Independence

*Limited resources for professional editorial staff.
Pressure to secure funding can affect editorial independence.*

3. Visibility and Discoverability

*Limited indexing in major academic databases.
Lack of marketing and outreach efforts.*

Challenges of Diamond Open Access Journals

4. Technological Infrastructure

*Many journals operate on outdated platforms.
Issues with interoperability and long-term archiving.*

5. Inequities and Regional Disparities

*Geographical and technological disparities limit access.
Language barriers impact global visibility.*

6. Recognition and Research Assessment

*Limited recognition in academic evaluation systems.
Journals may have low citation impact.*

7. Lack of Policy Support

*Insufficient government and institutional policies.
Fragmented policies across regions and disciplines.*

1. Expanding Funding Models

Diverse Revenue Streams: Explore partnerships with universities, governments, and philanthropic organizations.

Grants & Sponsorships: Focus on creating long-term, sustainable grant models for OA initiatives.

Crowdfunding: Engage the scholarly community in funding initiatives, creating collective ownership.

2. Strengthening Policy Support

Global Policy Alignment: Collaborate to create consistent policies that support Diamond OA at the national and international levels.

Government Initiatives: Advocate for public funding and recognition of Diamond OA in national research policies.

3. Improving Technological Infrastructure

Platform Integration: Enhance interoperability between existing Diamond OA platforms for seamless access.

Modernization: Upgrade technological infrastructure to improve user experience and long-term sustainability.

Open Standards: Promote the use of open-source technologies and shared platforms for collaboration.

4. Increasing Global Collaboration

Regional Partnerships: Foster cooperation between regional initiatives like Redalyc, Scielo, and others.

Capacity Building: Provide training and resources for researchers and editors in emerging regions.

International Cooperation: Build global networks to share resources, data, and best practices.
