

2nd Global Summit on Diamond Open Access

8 - 14 December 2024

TOLOUCA - CAPE TOWN DECLARATION ON DIAMOND OPEN ACCESS

Following the 2023 Toluca Global Summit, we, the 2024 Cape Town Global Summit participants, affirm that sharing knowledge is a human right.

As such, scholarly knowledge must be a public good. It must be accessible to all communities, including readers and authors, without barriers and paywalls. Participation in knowledge production and communication must be free of prejudice and bias.

In line with the 2021 UNESCO Recommendation on Open Science, Diamond Open Access is community-owned, community-led, and non-commercial.

Social justice, equity, and inclusivity are fundamental to Diamond Open Access, enabling it to be a driver of decolonisation and demarginalisation.

We commit to regional and language diversity in scholarly communication. The implementation of Diamond Open Access needs to be tailored to address both local and global challenges and supported by systems of research assessment.
